Suggestions for Improvement:	Your lesson plans include a variety of elements for student learning, but you missed some of the key details in implementation. Make sure to use a variety of forms of check ins to see what and how you learners are understanding the information. Don't be afraid to use several classroom management tools to keep learners engaged. With more practice I think your comfort level in asserting yourself and leading the entire room and pacing will grow.
Overall Rating:	Partially Proficient
Suggestions for Improvement:	I appreciated how you planned for several discipline areas and tried a variety of instructional strategies. Think about now use what you are learning from the learners about how they are processing the information to scaffold their experiences throughout the lesson OR reteach elements when needed. Don't just stay in the middle of the lesson. This is what I mean by digging deeper. Being in-tune with the learners will help you to not cap-out their knowledge. This can come with more practice.
Overall Rating:	Proficient
Do you believe this practicum student has the knowledge, skills, and attitude required to become an effective student teacher?	Yes
General Comments:	I enjoyed your enthusiasm and "ah-ha" moments throughout the semester. I can see that you want to grow your skills. Now is the time to push yourself to the next level of teaching. Block II will help you to make even more sense of this idea of 'digging deeper' and going to the next level so that you can continue to grow your skills and be fully ready to student teach.
